

COVID-19 Directive

Radio Bingo

Phase 1

Date: June 5th, 2020

A Local Radio Station submitted a request on the advisability of resuming community bingo games. These games involve the calling of bingo numbers over the local radio station with individuals playing in their households.

With the understanding that the activity does not involve any gatherings, the following specific conditions are provided to manage the risk associated with the activity in Cree communities:

- The mode of purchasing of cards must prevent the accumulation of customers, therefore, delivery, kiosk or one-way traffic through facility (customers entering one door, with proper spacing and exit from another door) must be implemented.
- Paper money can be used but staff must wear gloves and wash hands after handling at a station designated for handling the funds, which is wiped with disinfectant after each transaction.
- Claiming of prizes or other verifications must follow the same modes of procedure as purchasing cards.
