

SITUATION IN QUEBEC (OUTSIDE EEYOU ISTCHEE)

Omicron is spreading at an alarming rate across Canada. Health care staff in Eeyou Istchee are under enormous stress due to staff shortages and an increase in cases in the communities. While the Omicron variant is driving this current surge of cases, the Delta variant is still circulating in Quebec, with a higher risk of illness and hospitalization.

Medical staff and public safety staff are working very hard under very challenging conditions, they deserve our patience and respect.

If you think you have come into contact with someone who has COVID-19 you must assume you have COVID-19.

- Self-isolate right away for 10 days.
- If you have symptoms, call your CMC to plan a test.
- If you don't have symptoms, wait 3-5 days before calling for a test.
- **If you are isolating and received a negative result on your first test, you must finish the 10-day isolation period.**

We still have members of our community who are vulnerable and a health care system that is very fragile, everyone is requested to do everything they can to help:

- Respect isolation protocols
- Respect social distancing and sanitary advisories
- Do not take unnecessary risks in travel or gatherings
- Get vaccinated (Including Booster) when available

STATUS OF CASES IN EEYOU ISTCHEE

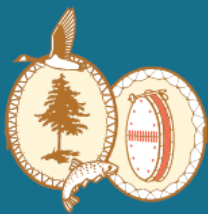

PCR positive test results from Public Health as of December 27, 2021*

Mistissini - 14

Chisasibi - 32
Whapmagoostui – 3

TOTAL – 98

Regional contacts to be investigated : 604

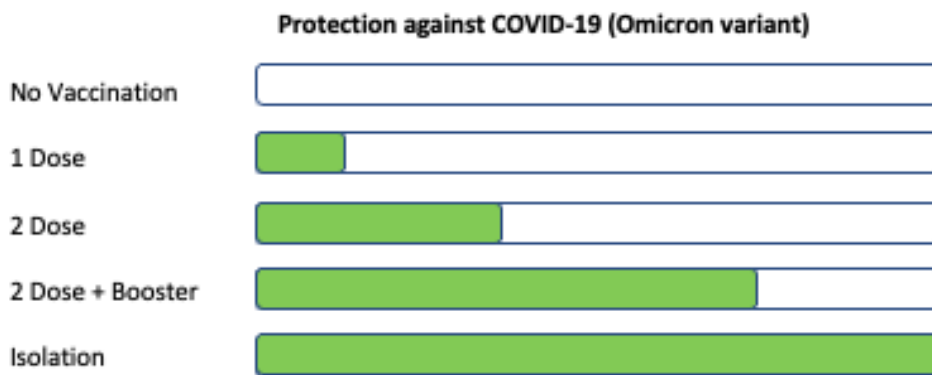

**PCR positive test results total does not include Rapid or IDNow test results*

Vaccination Campaign

Evidence has shown that full vaccination (2 doses) results in 35-40% effectiveness against Omicron. Effectiveness against Omicron goes higher to 75% after the third shot (booster). This is another reason demonstrating the importance of getting fully vaccinated. Booster (3rd) doses are now available at your local clinic. Please call to schedule an appointment.

A minimum of 3 months is required between dose 2 and the booster (dose 3).

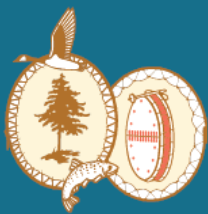

Phase 2 Deconfinement in Eeyou Istchee

Phase 2

PROTOCOLS WHEN RETURNING FROM AN AREA OF RISK

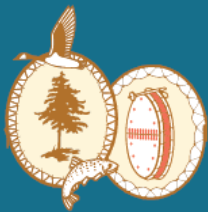

Protocol 1: **The Tests on Day 5 or Between Day 5-7 are very important and are not optional and are critical in protecting our communities during these uncertain times.*

Protocol 2: *ATTENDING A PUBLIC PLACE BEFORE RECEIVING A NEGATIVE TEST AFTER RETURNING FROM AN AREA OF RISK IS PROHIBITED*

Please contact your local CMC to schedule a COVID-19 test (PCR or Rapid test to be determined).

Protocol 3: *INTER-COMMUNITY TRAVEL IS NOT PERMITTED FOR ANYONE ARRIVING FROM AN AREA OF RISK*

It is important to verify the status of restrictions and procedures from Local PSOs for receiving authorization to enter a community.

Examples*:

- Fully vaccinated + booster post-secondary student, anyone returning home or a contractor from an Area of Risk such as Gatineau **WILL NOT** need to isolate.
- Non-fully vaccinated post-secondary student, anyone returning home or a contractor from an Area of Risk such as Montreal (Montreal is currently an Area of Risk) **WILL** need to isolate for 10 days.
- Fully vaccinated + booster parents returning home from an Area of Risk such as Quebec City (Quebec City is currently an Area of Risk) with children or family members that are not fully vaccinated: The parents **WILL NOT** need to self-isolate but the non-fully vaccinated children or family members **WILL** need to self-isolate for 10 days.
- Fully vaccinated + booster parents returning home from Toronto (Toronto is currently an Area of Risk) with non-fully vaccinated children at home who didn't travel with their parents: The parents who travelled and the children who did not travel **WILL NOT** need to self-isolate and may continue to attend school or daycare.

** The above are examples using current Areas of Risk. Please consult the map to verify Areas of Risk before travelling.*

***All fully vaccinated + booster individuals returning from an Area of Risk must adhere to protocols as mentioned above.*
